Rubrics

Criteria	Weightage	Level 4 (Exemplary)	Level 3 (Proficient)	Level 2 (Developing)	Level 1 (Beginning)
Concept Identification	25%	Identifies all key concepts from literature accurately and comprehensively	Identifies most key concepts with minor omissions	Identifies limited concepts; some are irrelevant or missing	Fails to identify essential concepts
Linkages	25%	Establishes clear, meaningful, and accurate relationships between concepts	Shows correct relationships with minor gaps	Relationships are weak, unclear, or partially incorrect	No meaningful relationships established
Organization	20%	Concepts are well-structured hierarchically with logical flow and grouping	Mostly organized with minor structural issues	Some organization but lacks clear hierarchy	No logical organization or structure
Integration of Literature	20%	Integrates multiple studies effectively to show connections and comparisons	Shows some integration of literature	Limited integration; mostly isolated concepts	No integration of literature evidence
Clarity	10%	Concept map is clear, neat, visually structured, and easy to interpret	Generally clear with minor readability issues	Clarity is reduced; difficult to interpret in parts	Poorly presented and hard to understand

Annexure A – Concept Mapping

Questions:	EACH QUESTIONS CARRIES : 10 MARKS	Duration :ONE HOUR
------------	-----------------------------------	--------------------

Q8 A program processes complex nested data structures and requires efficient computation. Construct a concept map connecting Recursion → Call Stack → Memory Usage → Iteration → Loop Control → Efficiency. Compare the two approaches in terms of execution flow, memory consumption, and performance. Analyze their advantages and limitations, and justify which approach is more efficient in
